

WSTIMS For Windows

Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	H	1.0.1.43	CodeValueList	Jump timing chart Eliminate wide tolerances. Changes being made to have just one set of tolerances	Updated chart for 2012. Eliminated wide tolerances. Only standard and record now.
Closed	H	1.0.1.43	Import	Allowed a skier to be imported in class L for a class C tournament	Added validation to ensure only proper classes are loaded for OLR entries on registration template.
Closed	HH	1.0.1.43	Jump Entry	Ramp height is not being adjusted when default is greater than division maximum	Ramp height default is set based on last selection. Added functionality to skier selection to recognize when default is greater than division maximum and to set to the division maximum. Also added a warning if the selected ramp height for a subsequent round is different than a skier's first round selection.
Closed	L	1.0.1.43	Load Iwwf Homologation	Function to copy default file to tournament location is failing.	Found typo in the copy command. Corrected and now the file is properly loaded when the feature is used.
Closed	M	1.0.1.43	Running Order	Add support for running orders by round.	Added support to generate a running order per round. Use the "View / Edit by Round" button on the running order window to access options for generating running orders for rounds. There is now support to generate a Head-to-Head type running order, or an order based on previous round scores which includes the ability to create an order using elimination criteria.
Closed	H	1.0.1.43	System Main	New Database not copying	Determined that the location of the system data folder for a deployed application was different than in the testing environment. I have identified the system variable that has the proper location and the default database should now be loaded correctly.
Closed	H	1.0.1.43	Slalom Team Summary	SQL error. Column name not valid TM RunOrder	Corrected issue with retrieving team data and team running order.
Closed	H	1.0.1.43	Trick Team Summary	SQL error. Column name not valid TM RunOrder	Corrected issue with retrieving team data and team running order.
Closed	H	1.0.1.43	Jump Team Summary	SQL error. Column name not valid TM RunOrder	Corrected issue with retrieving team data and team running order.
Closed	H	1.0.1.43	Team Management	Generate skier run orders not working correctly	Correct run order processing. Also enhanced processing to generate run order separately for each division
Closed	H	1.0.1.43	Slalom Entry	Incorrectly retrieving event group list for collegiate tournaments	Enhanced processing to handle collegiate divisions.
Closed	H	1.0.1.43	Trick Calc	Incorrectly retrieving event group list for collegiate tournaments	Enhanced processing to handle collegiate divisions.
Closed	H	1.0.1.43	Jump Entry	Incorrectly retrieving event group list for collegiate tournaments	Enhanced processing to handle collegiate divisions.
Closed	H	1.0.1.43	Scorebook	SQL error. Column name not valid TM RunOrder	Corrected issue with retrieving team data and team running order.
Closed	M	1.0.1.43	Scorebook	Event group showing as blank	Event was not being calculated and made available to the report. Processing corrected to fix this issue.
