

WSTIMS For Windows

Fix List

Status	Priority	Fix Version	Program Version	Component	Issue
Closed	H	151	1.0.1.51	Slalom Summary	Points calculations is producing a negative value when the socre is less than the minimum allowed. Generally this happens if someone misses their opening pass
Closed	M	151	1.0.1.51	Master Scorebook	Placements for elimination format needs improvement
Closed	H	151	1.0.1.51	Web Scorebook for IWWF	Using wrong methods for calculating 1000 points and determining placements
Closed	H	151	1.0.1.51	Master Scorebook	Placements using the "Final" option are not properly calculating placements
Closed	H	151	1.0.1.51	Master Scorebook	Placements for IWWF tournaments are not utilizing tie breakers and runoffs
Closed	M	151	1.0.1.51	Running Order	Orders for elimination format should be set in the inverse seeding order
Closed	H	151	1.0.1.51	Chief Judge Report	Exception encountered for ELR tournaments during Tournament Pacakage Build

WSTIMS For Windows

Fix List

Notes
checked for this condition and now calculate points based on actual score.
Enhanced functional for "final" scores option. I believe this will solve this problem.
Created separate methods for IWWF processing for these and fully incorporated the new functionality for the Master Scorebook window, HTML scorebook, HTML scorebook championship version, and the SBK export file
Enhanced placement calculation for the Final option to use the last round skied for determining placement. This method assumes that those in the later rounds are an elimination format and therefore are placed higher than those that didn't ski the later rounds
Enhanced processing to use appropriate tie breakers and runoffs
Enhanced processing to set running order in the inverse of the skier seeding for elimination format.
Errors were found in the data validation for this format. Also corrected processing to better handle empty data fields and jump meter data
