Closed	M	3.0.0.9	Registration	When adding a member to the tournament it requires several steps if the skier has to be added as a new member. In this situation the member needs to be added as an available member and then searched to be added to the tournament. Generally if a new member is being added it is to add them to the tournament. This should be a step process.	Enhanced the new member feature of the Tournament Registration window to display the dialog to add the member to the tournament automatically after adding the new member. Previously you add to add the member and then search to add to the tournament.
