WSTIMS For Windows
Fix List

Status	Priority	Program Version	Component	Issue	Notes
Closed	M	1.0.1.53	Jump Scorebook	Speed is showing as zero	Wrong field was being displayed on report
Closed	H	1.0.1.53	Database Upgrade	Upgrade seems to be dropping data occasionally	Unsure why this is happening. I think it has to do with a new database being copied inadvertently. Not sure yet how to prevent it but I've added a timestamp to backup so that it is never overlayed and should allow recovery of any version
Closed	H	1.0.1.53	CodeValueList	L2 max jump speed is 48 and should be 51	Corrected
Closed	M	1.0.1.53	Jump Time Report	Errors in calcuations causing exceptions	Errors caused by incorrect calculations when time recording changed from 1,2,4 to 1,3,4
Closed	H	1.0.1.53	Boat Use	Not saving current row when clicking on the add icon.	Enhanced processing to better detect when changes had been made to ensure no updates are lost.
Closed	H	1.0.1.53	Tournament Package	Some were encountering an exception when running the tournament package	Exception was caused when a default value was being improperly set. This only happened when the master scorebook window had not been previously been used. Default value is now being properly set so exception should no longer occur,.
Closed	M	1.0.1.53	Master Scorebook	Jump speed is showing as zero	Wrong field was being displayed on report
Closed	M	1.0.1.53	Web Scorebook	Jump speed is showing as zero	Wrong field was being displayed on report
Closed	H	1.0.1.53	Skier Performance File	Jump speed is showing as zero	Wrong field was being displayed on report
