NCWSA Scoring with WSTIMS for Windows
Reference Guide Addendum
Updated April 4, 2013   (most recent Version as of 3/23/13 – V67)
Yvonne Downs

Preliminary preparation for setting up and scoring a NCWSA tournament: Review the current NCWSA Rulebook and the Instructions for Online Registration. If you've been away from Collegiate scoring for a few years, take the time to read the instructions for the OLR.

Be sure you have the latest WSTIMS for Windows upgrade on all the scoring computers.

NCWSA Divisions – References: Both forms of reference are used in various places in Comments and the WfW Program

CM	Men A	College Men, A Team
CW	Women A	College Women, A Team
BM	Men B	College Men, B Team
BW	Women B	College Women, B Team
NT	non-Team skiers, those ineligible per NCWSA rules who ski in their Age Divisions	

Setting Up the Tournament on the Tournament List Screen

The Sanction will be in this format: 13**U**123. "U" instead of Region code for NCWSA. Federation: USA. Most Collegiate tournaments are Class "**C**". A very few are sanctioned as "L".   For Rules choose "**Collegiate**". Be sure to enter **1** for the Slalom, Trick and Jump Rounds.

Template Preparation and Upload

Download the template for your tournament. Use the single **Registrar** tab for NCWSA tournaments scored with WfW. The Registrar tab is pre-populated from the NCWSA OLR and has the same information that is on the four tabs that were used with DOS WSTIMS. The appointed officials are shown at the top of the Registrar tab. (Shown on Men BTm Tab for DOS)

Steps to finish "grooming" the template before saving to upload to WfW:

- Skiers who are split between A Team and B Team are left on one line – WfW import handles the split. They will show as two lines on the WfW Registration Screen.
- Make necessary corrections for late changes to skiers and rotations.
- Pre-Entered Officials (Appointed) have "OFF" in Column D and "CM" or CW" in Column E. No action needed unless they are going to ski.
- Put second line in Template for Chiefs and Assistant Chiefs so their ratings are in the system for reference. Don't want Senior or PanAm Judge listed as "Regular" on CJ Report. (Suggestion, not mandatory)
- Enter **ALL** other Officials who are coming or might come.
- Enter **OF** in column I (Slalom Event Column) for all non-skiing added Officials
- Skiing officials and other **N**on-**T**eam skiers – Enter regular AWSA Age Divisions in Column E (Div) and **NT** (suggested code, supported by WfW) in the S, T and J column of events entered. Avoid event codes with A or B to avoid confusion with the Team skiers.
- Caution: NCWSA Template Columns line up with other Template Columns A-L. M forward they do not.
- A very few officials and skiers may import without their "Ready to Ski" box checked. Review Registration Screen and check boxes as needed.

Predetermined Team Sequences: If the tournament is seeded or the Team sequences are otherwise predetermined enter the Sequences in the two Header lines for each Team. Sample from template:

| Team Header | Univ of LA Lafayette | ULL | CM | 5 5 5 |
| Team Header | Univ of LA Lafayette | ULL | CW | 2 2 2 |

WfW will assign the CM sequences to CM, BM, BW. The CW sequence will be assigned to CW. This can be adjusted – more on that later.

Save the completely edited Template in Excel. Then save it as a Text (Tab delimited)(*.txt) file into your WfW folder for the tournament. Use the same procedure as with other tournaments. (Be sure to keep your Template in Excel when closing it.)

Importing the file into WSTIMS for Windows:
Now it is time to upload your txt file. Go to: Administration, Import, Collegiate and upload the template. Note any errors cited during the upload. Fix as needed.

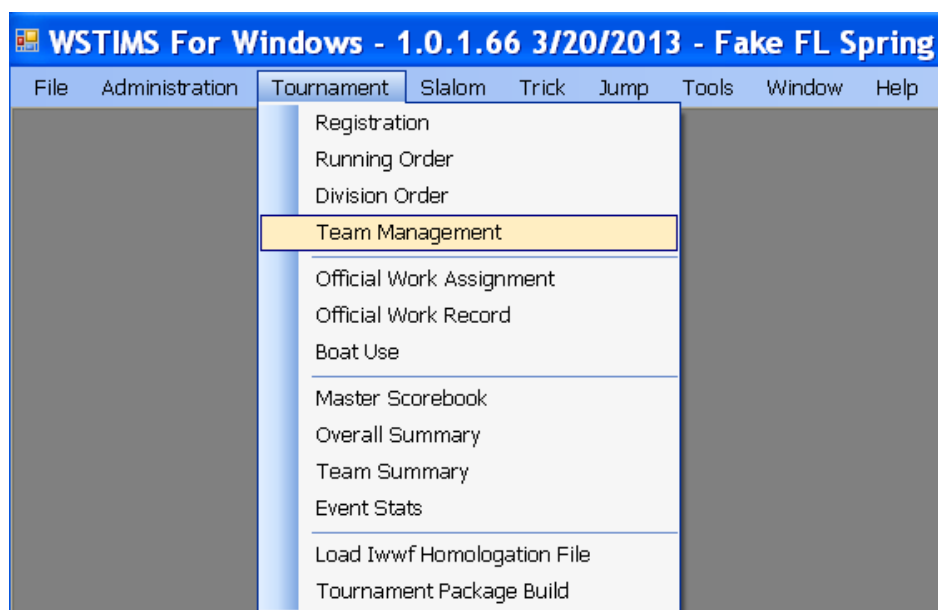

.
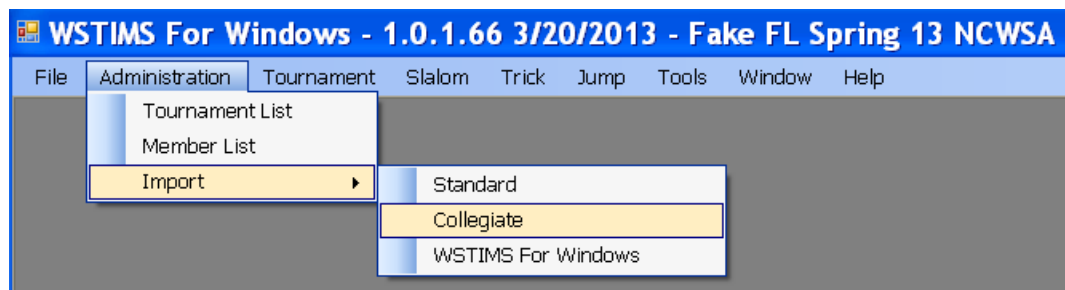

Registration Screen: IMPORTANT – Go to Tournament, Registration Screen to review the upload. **Verify** that the "**ready to ski boxes**" are checked for the skiers and officials.

The skiers who are entered in A **AND** B Events are on **TWO** lines. See example below. This is necessary since they are in two Age Groups.   Watch for this when changing skiers' events or adding skiers.

Team Management: The next stop is Team Management found under Tournament.

Team Sequences entered in the Template Headers will show here. If the B Men and B Women are supposed to have different Sequences than A Men, manually edit them and Save.

Many Collegiate tournaments use the computer "Random Draw" options. If "All" button is checked followed by clicking on "Random Order" WfW gives the same Sequence for Slalom, Trick, and Jump within each Division. CM/CW/BM/BW will each have their own Sequence. If you want them the same, edit to match CM. (or other).

A more complete "random" draw can be achieved by drawing for Slalom, Tricks and Jump sequentially. Check Slalom, then Random Order for slalom draw. Next click Trick and Random Order, then Jump and Random Order. Once you have done your draw, click Save. **DO NOT revisit Random Order** or you will end up with changed Sequences.   You may want to enter the Sequences on your original Excel template in case of a reload – the Team Sequences will be protected.

Notice that Tricks still has the original Random sequence since only Slalom and Jump were checked and Random Order clicked.

The Template, Random Draw buttons, or manual entries can be used to control the Team sequences.

The next step is to click "**Assign Order**" to put the skiers in the Team Sequence and Skier Rotation order.

Click "Show Unassigned" to verify that all Team Skiers have Team Codes entered. In the following example two skiers need Team Codes entered. Team codes must be the correct three letters and ALL CAPS for the skier to be associated with their Team.

RUNNING ORDERS are found Under Tournament (S T & J), or under the Three Events.   A new Group filter has been added. Choose All, a Division, or combination of Divisions. Refresh. Skiers should be in proper Team Sequence and Rotation order.

The "old" Filter Dialog Form still works.

Running Orders

"Print" will produce a Running Order for review or posting. WSTIMS for Windows will create side-by-side running orders. Answer "Yes" to the pop-up box or "No" if you prefer single running

orders. Name files so you can recognize them, open in Notepad (or your choice of Program) and Print.
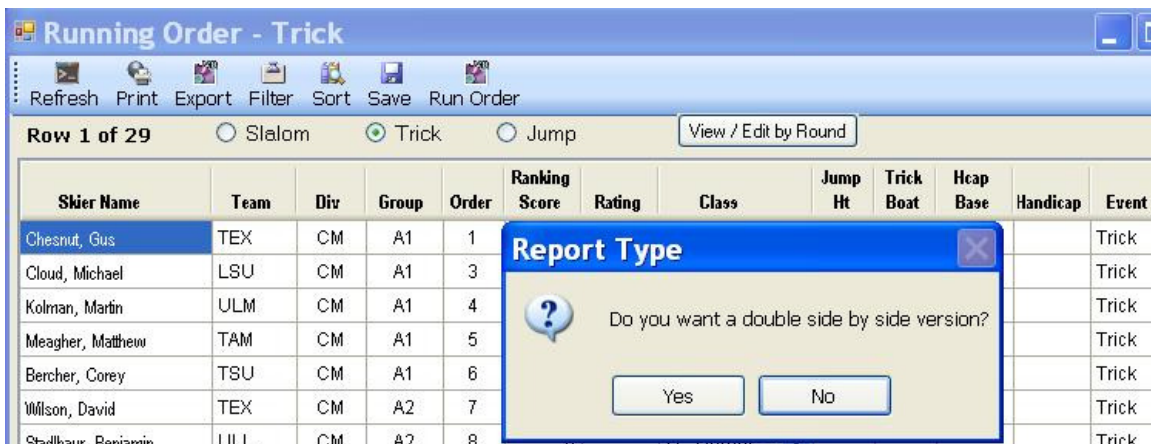

ADDING SKIERS DURING THE TOURNAMENT

SUMMARY OF STEPS
- Go to Registration Screen. Add skiers and update Rotation information
- Go to Team Management, **Assign Teams** to added skiers and **Update Assign Order** (DO NOT TOUCH RANDOM DRAW)
- Go to Running Orders and redo the ones with changes.

Add skiers using the Registration Screen like any other tournament. Use Team Management to add the skiers' Team Codes. Running Orders Screens can also be used – be careful to use correct Team letters and ALL CAPS. The Team Code must be entered for each event (STJ) the skier is entering.

On Team Management Screen verify that there aren't any unassigned skiers. Update Assign Order.

Skiers who have A **AND** B events **must** have two lines on the Registration screen. If a B Team skier is changed to A for an event(s), that skier must be added as a CM or CW creating a second line on the Registration screen. Same for adding B event(s) for A Team skiers. See Registration Screen above. (The original template load automatically splits the pre-entered skiers)

Slalom Scoring

The two lowest speeds are disabled as NCWSA Rules call for slalom starting at 19.3 mph / 31 kph. This applies to CM/CW/BM/BW. NT, non-Team Age Division skiers, may start at 15.5.

Trick Scoring

For Collegiate ONLY wakeboards are entered with a "W" and score one half of one ski credit. Team skiers have one trick pass. Age Division skiers have two trick passes. **Verify that the scores are showing in the deep red score boxes** after each trick skier is scored. Scores also show on the skier selector – names etc on left. If changes are made during entry, be sure to use "Calc Score".

EVENT SUMMARIES   Set Event Summaries for **Placement**, **Points and Division**. The Drop-down menu allows choosing a single Division. A report can be printed after each event.

TEAM SUMMARIES   There are Team Summaries under the Slalom, Trick, Jump and Tournament Drop-downs. The **correct settings** for the reports are Best, **Placement, Points**, **By Div** and **4** (scores per Team per NCWSA Rules) **Check the settings** when opening the Team Summaries. A drop-down is provided so the Team Summary can be selected by Division.

Viewing Onscreen Various combinations of "View Team Results", "Show Team Skiers", and "Show All Skiers" changes the screen view for lookup and reference.

PRINTING TEAM SUMMARIES The "Team Results" option will print a two part report, first part showing Total Points by Team, the second part showing Total Points by Team and points by contributing skiers (up to 4 scores per Team). The "Skier List by Team" details all the skiers (maximum five per Rules) by Team. Be sure to select the applicable Division and Refresh before printing.

A combination of these reports and the Event Summaries provide complete information on the Events.
